SUMMARY

Senior Software Developer with experience building scalable distributed systems and high-performance applications using MERN stack. Specialized in system design, caching (Redis), load balancing (Nginx), and cloud infrastructure. Delivered production platforms serving 80K+ users, reducing latency by 40% and infrastructure costs by 20%.

SKILLS

Languages	JavaScript (ES6+), Python
Frontend	React.js, Next.js, React Native, Tailwind CSS, Redux Toolkit
Backend	Node.js, Express.js, REST APIs, MongoDB, MySQL
Systems	Distributed Systems, RBAC, Multi-Tenant Architecture, Redis Caching, SEO
DevOps	AWS (EC2, S3, Lambda), Nginx, PM2, CI/CD (GitHub Actions), Cloudflare
Tools	Firebase, Postman, Lighthouse, Google Analytics

EXPERIENCE

Senior Software Developer Jan 2025 - Present
Dexterous Technology, Hyderabad

- Promoted within 11 months for leading a high-scale platform upgrade improving performance by 30%.
- Architected 5+ full-stack applications handling 50K+ monthly users using MERN stack.
- Accelerated API performance by 40% through query tuning, indexing, and Redis caching.
- Established scalable infrastructure using Nginx load balancing and PM2 clustering, achieving 99.9% uptime.
- Reduced cloud expenditure by 20% through efficient AWS (EC2, S3, Lambda) utilization.

React.js Developer Trainee Jul 2024 - Dec 2024
Lejhro Technology (Remote)

- Crafted responsive UI systems increasing load speed by 25% across devices.
- Orchestrated global state management using Redux Toolkit, minimizing unnecessary renders by 30%.
- Strengthened authentication workflows, decreasing production defects by 15%.

Web Development Intern 2021
Naresh IT, Hyderabad

- Constructed full-stack e-commerce platform covering product, cart, and order modules.
- Streamlined database queries, improving backend response time by 20%.
- Delivered secure authentication and API integrations for user management.

PROJECTS

EWShopping – AI-Powered Multi-Vendor Marketplace

- Built production-scale platform supporting 3000+ sellers and 80K+ users.
- Designed distributed architecture using Nginx load balancing and PM2 clustering.
- Implemented RBAC, JWT authentication, and Firebase OTP login system.
- Engineered AI-based search and dynamic SEO rendering increasing organic traffic by 35%.

- Reduced database load by 60% using Redis caching and CDN optimization.

KiranaWorld – Multi-Vendor E-Commerce Platform

- Built scalable multi-store system handling 1000+ products and real-time inventory.
- Integrated Razorpay payments and wallet system increasing transaction success rate by 25%.
- Designed REST APIs and admin dashboard for centralized control.

Driveome – Ride & Delivery Platform

- Engineered real-time tracking system using Socket.IO and Google Maps API.
- Integrated UPI, Razorpay, PayU, and wallet payments improving payment success by 30%.
- Implemented referral and cashback systems increasing user retention by 20%.

SalonTreat – Booking Platform

- Built multi-vendor booking system with slot management and real-time updates.
- Improved booking efficiency by 35% through optimized scheduling logic.

Rajyabharat – News Platform

- Built multi-reporter system with RBAC and multilingual support.
- Increased page load speed by 40% using CDN and optimized asset delivery.
